

## **What is Deflation? How to Survive the Coming Greater Depression.**

*A MAJOR NEW ECONOMIC TREND IS NOW SOLIDY IN PLACE... IT WILL FOOL 9 OUT OF 10 INVESTORS AND AFFECT EVERYTHING YOU OWN.*

Livermore, CA ([BizHWY](http://www.bizhwy.com)) August 12, 2010 - How to survive and even get rich in the coming [b]GREATER DEPRESSION.

There is a worldwide mood change to pessimism. I am a follower of the new science of socionomics that follows societal mood swings. Find out more about this new study and the Elliott Wave Principle at our website.

The mood of the people is getting downright nasty. In a recent poll, 54% said they think there is furthur downside to the recession. Wealth can evaporate into nothingness. Real estate deflation has reached 50% in some areas. Trillions of dollars gone. Poof! Stock and bond markets are jittery. A [b]FLASH CRASH drops the DOW 998 points in minutes.

I have proof the real top in stocks was the year 2000. We have been living on both borrowed time and borrowed money. We are 10 years into the Greater Depression. All the governments in the world put together cannot stop the deep destructive deflationary depression coming our way. What is deflation? It is the popping of the crazy credit mania bubble climaxing 80 years of inflation. The only cure for inflation is a deflation. All credit inflations end this way. Sorry!

This economic **SEACHANGE** will kick your butt if your are not prepared ahead of time. **Hurry before it is too late! Save yourself and your family so that you can stay out of the soup lines and tent cities.**
