

Hands-On Physical Therapy and Athletic Rehabilitation Center to initiate Laser Therapy

Hands-On Physical Therapy and Athletic Rehabilitation Center will be one of the few Physical Therapy clinics to offer laser therapy for the treatment of musculoskeletal injuries

Southfield, MI ([BizHWY](#)) October 7, 2010 - The US FDA has recently approved the use of laser therapy for the treatment of various musculoskeletal injuries.

Despite its usefulness in physical therapy with treating patients with various injuries and musculoskeletal conditions, and due to its relatively new introduction and cost, most physical therapy facilities have not yet included laser therapy as a treatment intervention.

Under the direction of Dr. Mikhail Muhammad, Hands-On Physical Therapy and Athletic Rehabilitation Center will be one of the few Physical Therapy clinics in the state of Michigan to offer laser therapy for the treatment of musculoskeletal injuries.
