

## New capsule for Botox Bruising!

*A recently developed capsule called Arnika Forte was developed to aid in healing from bruising or trauma following Botox or Filler injections. Visit [www.antibruise.com](http://www.antibruise.com) for releif.*

Malvern, PA ([BizHWY](http://www.bizhwy.com)) October 11, 2010 - A Malvern Pennsylvania company recently developed a product that may aid in healing of bruises from Botox and Filler injections. According to the American Society of Plastic Surgeons, in 2010 Botox was the number 1 procedure preformed in aesthetic offices. Even with this beautifying procedure, some patients can leave the office with a bruise from the injection. This was recently played out in the reality show "Keeping up with the Kardashians", when Kim went to the Plastic Surgeon for Botox injections, and was bruised. Even though she admits to over reacting to the bruising, this is perfectly normal following either Botox or Filler injections. Kim should of visited [www.antibruise.com](http://www.antibruise.com) to learn more about bruising, treatment, and how to obtain Arnika Forte.
