

Sedona Marketing Magic to distribute free QR codes, Virtual Business Cards, create Apps

Internet access is now 50% by smartphone, and website owners are increasingly facing a loss of traffic as their websites are not readable on tiny smartphone screens. We have the solution here now.

Sedona, AZ ([BizHWY](http://www.bizhwy.com)) November 12, 2012 - Sedona Marketing Magic and the ICANetwork (Internet Customer Acquisition Network) have joined forces to introduce a new and exciting service for business owners that will enable them to keep up with the rapidly changing technological environment on the Internet.

GaryMialocqFreeQRcodes.mobi is provided courtesy of TheICANetwork. We provide AFFORDABLE mobile marketing solutions for local businesses. To introduce you to our unique services, everyone who visits our website will get free QR Codes and free Virtual Business Cards, your keys to future business and personal communications. Visit <http://GaryMialocqFreeQRcodes.mobi> and get yours today.

Want to get your own smartphone App at a ridiculously low price? Be absolutely certain to visit our website, at <http://www.customsmartphoneapps.net> to check out our short video and see our custom phone apps product... We are #1 at Google under keyword, "custom phone apps" and for good reason -- pure product popularity.

Our business clients never have to use the yellow page type phone books ever again...their customers don't anyway. The internet has changed all of that. And if you have a PC or a smart phone, you know exactly what I'm talking about. Where do you find information for any local business or service? We both know, more often than not, you don't grab that big yellow book any more.

But there's more. We also provide every business customer with their own unique phone app, think "miniwebsite" that our business clients: members, subscribers, customers, and prospects can access and install on their smart phone - our business clients own unique smart phone app icon - and carry it with them all the time, but there's still more.

Our clients can text all of their phone app members anytime they want - FREE. And I bet you didn't know this: Studies show 95%+ of all text messages are read within five minutes of receipt - it's amazing. The uses for a business client's Smartphone App are unlimited.

Guaranteed Gold Google Service

We provide business owners with guaranteed first page listings at the major search engines including Google® and we are good at it. We have never failed. Everyone needs a SmartPhone App, and we will create one for all businesses, but when we accept an order from a business client, we only accept one business per category per market area for our Guaranteed Gold Google Service. Once that client says "Yes" we do not accept orders from any of their competitors for this special service. We will, of course, build their smartphone app.

We do this for two reasons. First, our guarantee is first page results, right?...To do the magic that we do for each client it would simply not be fair to them to do the same for a competitor in the same market area.

Secondly, we spend hours on each new clients account setup and this is done by real people, not some automated software program - building their custom website, setting up their phone app, putting them on that first page of results for keywords that they select and our ITs select for them. To do this for two plumbers, two pizza shops, two dentists, two independent reps for any product or service, etc, etc. you get the idea, in the same market area actually makes it more difficult for us to give those first page ranking results, but we can do it easily, handily, and without fail by accepting only one business per category, per market area.

"QR Codes are essential to Mobile Marketing...
