
Renowned Dermatologist Dr. Tina West Now Offers KeraLase® Hair Restoration at Her Practice, The West

Dr. Tina West is now offering the all-new KeraLase® hair restoration treatment to men and women in the Chevy Chase, MD area who are experiencing thinning hair and hair loss.

Chevy Chase, MD ([BizHWY](#)) August 30, 2022 - **Chevy Chase, MD** - Dr. Tina West completed two full residencies as well as a clinical dermatology research fellowship before specializing in cosmetic dermatology, laser surgery, and non-surgical body contouring. As an industry expert and owner of the West Institute, Dr. West continually stays up-to-date with the industry's foremost technologies, including the all-new KeraLase® hair restoration treatment.

KeraLase® is a unique treatment that combines the Lutronic LaseMD Ultra® laser with high concentrations of five growth factors and proteins called KeraFactor® serum to help restore and maintain hair growth. Each treatment session starts with a scalp treatment using the Lutronic LaseMD® or Ultra®, followed immediately by the application of the KeraFactor® serum, a proprietary and patented formula that allows for significantly higher concentrations of growth factors deficient in the skin during times of hair loss or poor hair health.

The treatment works for men and women of all ages experiencing thinning hair and hair loss, as well as patients who have previously undergone a hair transplant procedure. Treatments with KeraLase® are generally quick and comfortable. Dr. West works closely with each patient to determine the optimal treatment plan to achieve the best results. Upon following the treatment protocol as prescribed, patients may see improvements in scalp health and the appearance of thicker, healthier hair within 3 months and may continue to see improvements over the next 2-4 months.
