

## Tree & Plant Rescue - Our Work is Guaranteed!

*Tree & Plant Rescue LLC: The ONLY 100% organic tree/plant care that actually works -- and we guarantee it. No chemicals. Better for people, pets, environment (619) 630-7180 / [treeandplantrescue.com](http://treeandplantrescue.com)*

San Diego, CA ([BizHWY](https://www.bizhwy.com)) November 20, 2025 - Tree & Plant Rescue LLC Launches Game-Changing 100% Organic Treatment Protocol That Actually Works -- And Comes With an Ironclad Guarantee

Nationwide -- November 20, 2025 -- Tree & Plant Rescue LLC is proud to announce the only on-site plant and tree care service that refuses to compromise: 100% organic treatments, zero synthetic chemicals, proven results against insects and diseases -- and a full guarantee that backs every single job.

While most companies quietly rely on harsh pesticides that harm soil, pollinators, pets, and people, Tree & Plant Rescue LLC has developed a proprietary organic protocol that eliminates pests and diseases just as effectively -- without the toxic fallout.

"We're not here to spray and pray," said Mark Pagayon, Founder of Tree & Plant Rescue LLC. "We're here to rescue your trees and plants the way nature intended -- and we're so confident in our results that we guarantee them. If your plants aren't thriving after our treatment, we come back until they are. No excuses, no fine print." What sets Tree & Plant Rescue LLC apart:

- \* Truly 100% Organic 100% Every product we use is CDFA registered. No "mostly organic" loopholes.
- \* On-Site Precision Treatment 100% We diagnose and treat your specific trees and plants in person -- no blanket spraying.
- \* Proven Against Tough Pests & Diseases 100% Emerald ash borer, bark beetles, hemlock woolly adelgid, scale, aphids, fungal infections -- our protocol stops them cold, organically.
- \* The Only Guarantee That Matters 100% Healthy plants or we keep working until they are -- and if we can't save them, you don't pay.

Homeowners, estates, HOAs, and organic-minded property managers are already calling it "the service we've been waiting for."

One recent client said: "My 300-year-old oak was dying from Sudden Oak Death (SOD). Three different arborists deemed the tree dead. Tree & Plant Rescue saved it in one season -- completely organic -- and it's never looked better."

Tree & Plant Rescue LLC is now booking appointments and bringing genuine organic rescue to landscapes everywhere.
