

SPELLMAN SINISTATION LLC Introduces Automated Sanitation & PPE System

SPELLMAN SINISTATION LLC introduces SINISTATION, an automated sanitation and PPE dispensing system designed to improve hygiene, efficiency, and infection prevention across critical industries.

Brooklyn, NY ([BizHWY](https://www.bizhwy.com)) August 6, 2026 - BROOKLYN, N.Y. -- SPELLMAN SINISTATION LLC, a medical technology and sanitation innovation company, is developing SINISTATION, an automated hygiene and personal protective equipment (PPE) system designed to help organizations strengthen infection-prevention practices, improve PPE accessibility, and create more efficient sanitation procedures.

Created to address the continuing need for better hygiene and cross-contamination prevention, SINISTATION brings multiple sanitation and PPE functions together into one compact automated platform. The system is designed to provide hand and foot sanitization, automatic glove and shoe-cover application, face-mask and head-cover dispensing, and inventory tracking capabilities.

Rather than relying on multiple separate sanitation and PPE stations, SINISTATION is designed to provide organizations with a centralized solution that can support more consistent hygiene procedures while helping employees and facilities manage essential protective supplies.

"Our vision is to make sanitation seamless, smart and standardized," said Abdullah Spellman, Founder and CEO of SPELLMAN SINISTATION LLC. "SINISTATION is being developed to give organizations a more efficient way to integrate sanitation and PPE into everyday operations while helping protect employees, customers, patients and the public."

Serving High-Standard Industries

SPELLMAN SINISTATION LLC is initially focused on industries where sanitation, PPE use and infection prevention are especially important, including healthcare and medical facilities, hospitals, food-service operations, food-processing facilities, laboratories and other high-traffic institutional environments.

The company also sees future applications across educational institutions, government facilities, transportation hubs, hospitality, manufacturing and other environments requiring enhanced sanitation protocols.

Building the Future of Automated Hygiene

SPELLMAN SINISTATION LLC's business model is designed around equipment sales with additional recurring revenue opportunities through PPE and consumable replenishment, maintenance, technology and service programs.

As the company advances SINISTATION toward commercialization, SPELLMAN SINISTATION LLC is seeking relationships with healthcare organizations, pilot locations, distributors, manufacturers, strategic partners and investors that share its vision for improving sanitation infrastructure.

About SPELLMAN SINISTATION LLC

SPELLMAN SINISTATION LLC is a medical technology, sanitation technology and advanced equipment company developing automated solutions for hygiene and PPE management. Its flagship product, SINISTATION, is designed to integrate sanitation, PPE dispensing and inventory management into a single automated platform for organizations where hygiene and infection prevention are critical.

Company Vision:

A future where sanitation is seamless, smart and standardized--everywhere.

SINISTATION:

"It's a SIN not to have this station."
